

Cotton: World Markets and Trade

India Exports Fall Drastically as Imports Rise

2022/23 India cotton exports are projected down 500,000 bales this month to 1.8 million, roughly equal to its import forecast. Exports have historically exceeded imports by a significant margin, and the last time that imports exceeded exports was nearly 20 years ago. Lower domestic supplies, increased demand for foreign long and extra-long staple grades, and the Australia-India Economic Cooperation and Trade Agreement (ECTA) have all supported this recent dynamic.

The sum of 2022/23 beginning stocks and production is projected at a 14-year low of 33.1 million bales, significantly pressuring exports. Moreover, Indian spot prices relative to global prices surged earlier in the year, in part due to lower cotton supplies, slowing shipments to major markets including China.

Note: India basis is the marketing year average of the following computation: India spot price minus the U.S. Intercontinental Exchange nearby contract for cotton.

Higher imports are supported by lower domestic supplies and other factors including favorable import policies. Pleas from the domestic textile sector resulted in the temporary rescinding of the tariff on all cotton origins from April 2022 through September 2022, which supported strong early-season imports.¹ All origins are now subject to an 11-percent import duty.

The Australia-India ECTA is also expected to strengthen import demand. The agreement took effect this calendar year and allows India to import approximately 230,000 bales of Australia cotton duty free. High quality and competitively priced Australian supplies are expected to support spinners' late summer demands when domestic cotton supply is seasonally low.

India has recently become the largest consumer of long and extra-long staple cotton. Since the country doesn't grow enough domestically, grades including Egypt's Giza 94 and U.S. Pima are imported to support consumption (see page 9 of the 2023 India [Cotton and Products Annual](#) for more information). India will thus remain a steady source of import demand for this species of cotton.

Despite forecast to be the third largest exporter in 2022/23 at 1.8 million bales, exports are forecast drastically lower than the 6.2 million exported in 2021/22. Looking forward, the recent expansion in domestic spinning capacity could channel a greater share of supplies into domestic spinning instead of exports.

2022/23 Outlook

Global production is up from the previous month to 115.9 million bales and attributed to higher production in China more than offsetting a lower crop in Brazil.

Consumption is practically unchanged at 110.2 million bales and due to higher consumption in China offsetting lower use in Bangladesh and Turkey.

Global trade is forecast down more than 700,000 bales from the previous month to 38.8 million bales, the lowest level in 6 years. This month's adjustments are mostly attributed to less imports in China, Turkey, and Bangladesh. Lower Brazil and India shipments more than offset higher Australia and U.S. exports.

Global ending stocks are forecast up close to 900,000 bales to 92.0 million and mostly attributed to upward projections for China, India, and Brazil.

The U.S. balance sheet includes higher exports and lower ending stocks compared with last month. The projected U.S. season-average farm price is forecast down 1 cent to 82 cents per pound.

Note: To align more closely with WASDE terminology, several attributes related to cotton have been renamed on [PSD Online](#).

The attribute **Use Dom. Consumption** will now be titled **Domestic Use**.

Loss Dom. Consumption will now be titled **Loss**.

The **Domestic Consumption** attribute (the sum of **Use Dom. Consumption** and **Loss Dom. Consumption**) will no longer be available.

¹ On April 13, 2022, the Government of India rescinded its cotton import duty of 10 percent until September 30, 2022; however, imports arriving in October were allowed duty free if the bill of lading was issued prior to October.

Global Cotton Prices

Notes: **A-Index** is the average of the five cheapest quotations (quality being Middling 1^{1/8}) for Cost and Freight (CFR) at a Far Eastern Port; **U.S.** is the simple average of spot quotations reported by the Agricultural Marketing Service; **China** is the reported China Cotton Price Index (i.e. CCIndex 3128B) and reflects the national weighted average of cotton (3128B grade) delivered to more than 200 enterprises in China; **India** is the Shankar-6 (grade 29-3.8-76) spot price; **Brazil** is the delivered price in São Paulo city (grade strict low middling); **Pakistan** is the ex-gin price in Karachi.

Changes Since March WASDE (cents per pound)

	A-Index	U.S.	China	India	Brazil	Pakistan
6-Mar	98.9	82.3	102.2	97.2	96.6	88.2
6-Apr	94.9	80.9	101.4	97.3	88.1	82.4
Change	-4.0	-1.4	-0.8	0.1	-8.5	-5.8

Global cotton prices were mostly down since last month's WASDE with prices on the Intercontinental Exchange (ICE) settling at roughly 83 cents per pound. Strong U.S. export sales and shipments were offset by global macroeconomic concerns due to the second-largest bank failure in U.S. history. Commodity exchange-traded funds and the Dow Jones Industrial Average were mostly unchanged after falling in late March, while the S&P Retail Index was lower compared with last month. Macroeconomic concerns raised speculators' short positions and pressured prices.

Lower Brazil prices once again reflect slower-than-expected demand as witnessed by lower exports. Pakistan prices were down for the second consecutive month on both a weaker exchange rate relative to the U.S. dollar and seasonally slow domestic use.

2022/23 U.S. Shipments & Outstanding Sales (August 1 - March 30)
